True Identity 😎

Once, a young man asked the world-famous scientist A. P. J. Abdul Kalam:

“Sir, even after becoming so great, why are you still so humble?”

Dr. Kalam smiled and replied:
“A tree full of fruits always bends down… only an empty tree tries to stand tall.”

In life, a true leader is not the one
who rules over people…
but the one
who earns a place in people’s hearts.

Humility does not make a person small;
instead, it makes them so great
that people remember them with respect.

Many people have Power…
but only a few have Character.

Remember —
Ego may help someone win for a short time…
But humility helps a person win for a lifetime.
It is not important how big you become…
What truly matters is
how humble you remain after becoming great.
